**Florence Professional FF IAFF 3303**

**Entries with improper payments will be held until corrected**

Cameron Kelly Batson was a typical teenager pursuing his dreams of a Graphic Arts Design career and playing soccer. Tragically on October 6, 2010 Cameron, a Scott High Graduate and Captain of the varsity soccer team, died on the field while practicing with his only brother, Logan. Cameron's cause of death was Arrhythmogenic Right Ventricular Dysplasia (ARVD). This is a hereditary condition where heart muscle is replaced by scar tissue. His brother has also been diagnosed with ARVD and has had a defibrillator implanted in his chest.

Cameron's Cause is a foundation started by the family to help place Automatic Electric Defibrillators (AED's) in area schools and at school sponsored athletic events.

This golf outing is being held to help the family with funds to make their effort a reality. You can help by participating in the outing or making a donation directly to Cameron's Cause.
